

ORBITX LOGISTICS

Customer Support Knowledge Base

Version 1.0 | September 2026

This document is the authoritative knowledge source for the OrbitX AI customer-support assistant. Shipment-specific status data is stored separately in the tracking database.

1. Company Overview

OrbitX Logistics is a fictional technology-enabled logistics company serving individual customers, small businesses, and e-commerce merchants. OrbitX provides domestic parcel delivery across Egypt and selected international shipping services.

OrbitX customer support helps with service selection, delivery policies, packaging requirements, shipment status explanations, pricing rules, claims, returns, cash on delivery, and account support. Shipment-specific live status must be obtained through the shipment tracking system rather than inferred from this knowledge base.

2. Core Services

- Standard Delivery: cost-efficient domestic parcel delivery for non-urgent shipments.
- Express Delivery: faster domestic delivery with priority handling.
- Same-Day Delivery: delivery within the same day on eligible routes of 60 road kilometers or less.
- International Shipping: parcel delivery to selected international destinations, subject to customs and destination-country restrictions.
- Scheduled Pickup: courier pickup from an eligible sender address.
- Cash on Delivery (COD): collection of payment from the recipient for eligible domestic shipments.
- Shipment Insurance: optional declared-value protection for eligible shipments.
- Return-to-Sender: return service when a shipment cannot be completed or the recipient refuses delivery.
- Business Accounts: account-based services for merchants and companies with recurring shipment volumes.

3. Domestic Service Coverage

OrbitX provides Standard and Express Delivery across supported Egyptian governorates. Same-Day Delivery is available only when the road distance between the pickup and delivery points is 60 km or less and operational capacity is available.

Remote areas may require additional transit time. Service availability is determined by the route, shipment characteristics, operating hours, and local delivery capacity.

4. Domestic Delivery Time Estimates

- Standard Delivery - same city: usually 1 to 2 business days.
- Standard Delivery - different governorate: usually 2 to 4 business days.
- Express Delivery - same city: usually by the next business day.
- Express Delivery - different governorate: usually 1 to 2 business days.
- Same-Day Delivery: usually within 4 to 10 hours after successful pickup on an eligible route.
- Delivery estimates are not guarantees. Severe weather, road closures, high-volume periods, incorrect addresses, recipient unavailability, or operational disruptions can extend delivery time.

5. Business Days and Operating Calendar

OrbitX domestic business days are Saturday through Thursday. Friday is not counted as a standard business day for delivery-time calculations unless a special service explicitly confirms Friday handling.

Public holidays may affect pickup, hub processing, delivery, claims review, and international customs clearance.

6. Parcel Size and Weight Limits

- Maximum weight for a standard parcel handled through the regular parcel network: 30 kg.
- Maximum single dimension: 120 cm.
- Maximum combined dimensions (length + width + height): 200 cm.
- Shipments above the parcel limits require business freight support and are not eligible for an automatic domestic parcel quote.
- The sender is responsible for providing accurate shipment weight. OrbitX may reweigh a parcel and adjust the charge if the declared weight is materially inaccurate.

7. Packaging Requirements

The sender is responsible for packaging items so they can withstand normal transport, sorting, and handling. Outer packaging must be closed securely and must not expose sharp edges, loose parts, or leaking contents.

- Use a rigid outer box suitable for the item weight.
- Use internal cushioning so the item does not move freely inside the box.
- Seal all box openings with strong packing tape.
- Remove or cover old shipping labels and barcodes.
- Fragile items should be wrapped individually and separated from box walls.
- Liquids must be sealed in leak-resistant internal containers and placed inside protective secondary packaging.
- Electronics should be protected against impact and should not move inside the package.

8. Prohibited Items

The following items are not accepted through OrbitX standard parcel services:

- Weapons, ammunition, and explosives.
- Illegal drugs or controlled substances transported without lawful authorization.
- Highly flammable materials and dangerous explosive chemicals.
- Hazardous chemicals that require specialized dangerous-goods handling.
- Loose cash or currency as shipment contents.
- Live animals.
- Counterfeit or illegal goods.
- Any item prohibited by applicable law or by the destination country.

9. Restricted or Special-Handling Items

Some items may be accepted only when correctly packaged and when the requested route permits transport. Examples include electronics, glass items, liquids, food products, medicines that do not require special regulated transport, and high-value goods.

A restricted item may be rejected if packaging is inadequate, documentation is missing, or the route does not support safe transport.

10. Pickup Service

Customers may request a courier pickup from an eligible address. A pickup request is considered scheduled only after the system confirms the pickup window.

The package must be ready, sealed, labeled when required, and accessible to the courier. If the sender is unavailable or the package is not ready, the pickup may need to be rescheduled.

11. Shipment Tracking Statuses

OrbitX uses standardized shipment statuses. The customer-support assistant must not invent a status. Shipment-specific status should come from the tracking system.

- Shipment Created: shipment information exists, but physical pickup has not yet been confirmed.
- Pickup Scheduled: a courier pickup has been scheduled.
- Picked Up: the parcel has been collected from the sender.
- At Origin Hub: the parcel reached the first OrbitX sorting facility.
- In Transit: the parcel is moving between OrbitX facilities or service areas.
- At Destination Hub: the parcel reached the facility serving the delivery area.
- Out for Delivery: the parcel is with the delivery operation for a delivery attempt.
- Delivered: delivery was completed.
- Delivery Attempt Failed: a delivery attempt could not be completed.
- On Hold: movement is temporarily paused and the shipment may require operational or customer action.
- Customs Clearance: an international shipment is being processed by customs.
- Returning to Sender: the parcel is moving back toward the sender.
- Returned to Sender: the return process has been completed.
- Cancelled: the shipment was cancelled before successful delivery.
- Lost: OrbitX investigation confirmed that the shipment cannot be located.
- Damaged: OrbitX recorded confirmed or suspected physical damage requiring further handling.

12. Delivery Attempts and Recipient Unavailability

OrbitX normally makes up to two delivery attempts for an eligible domestic shipment. If the first attempt fails because the recipient is unavailable, cannot be reached, or access is not possible, OrbitX may schedule a second attempt on the next available business day.

If the second attempt also fails, the shipment may move to Return to Sender. Additional attempts are not guaranteed and may require a new delivery arrangement.

13. Recipient Refusal

If the recipient refuses an eligible shipment, OrbitX records the unsuccessful delivery and starts the Return-to-Sender process unless another authorized instruction applies.

The standard return charge is 70% of the original shipping fee. The return charge may be waived when OrbitX confirms that the return resulted from an OrbitX operational error, such as verified wrong routing or confirmed carrier-caused damage before delivery.

14. Address Changes

An address correction may be possible before the shipment reaches the final delivery stage. Address changes are not guaranteed after a parcel is Out for Delivery.

A major route change, such as changing the destination city or governorate, may require repricing or shipment reprocessing. Identity or authorization checks may be required before changing shipment details.

15. Domestic Pricing Rules

Exact domestic quotes should be calculated through the OrbitX delivery quote tool because the tool combines the current route distance with OrbitX pricing logic. The rates below define the pricing model used by the tool.

15.1 Standard Delivery

- Base fee: 45 EGP.
- Base fee includes the first 2 kg.
- Additional weight above 2 kg: 12 EGP per additional kg or started kg.
- Distance charge: 0.55 EGP per road kilometer above the first 30 km.

15.2 Express Delivery

- Base fee: 70 EGP.
- Base fee includes the first 2 kg.
- Additional weight above 2 kg: 16 EGP per additional kg or started kg.
- Distance charge: 0.75 EGP per road kilometer above the first 30 km.

15.3 Same-Day Delivery

- Base fee: 95 EGP.
- Base fee includes the first 2 kg.
- Additional weight above 2 kg: 20 EGP per additional kg or started kg.
- Distance charge: 1 EGP per road kilometer.
- Same-Day Delivery is unavailable when the calculated road distance exceeds 60 km.

16. Quote Calculation Rules

- The pricing engine rounds chargeable extra weight up to the next started kilogram.
- Distance-based charges use road distance returned by the routing service.
- The quote tool must reject regular parcel quotes above 30 kg and direct the customer to business freight support.
- The quote tool must reject Same-Day service when route distance is above 60 km and may recommend Express Delivery instead.
- Insurance, when selected, is added after the base shipping charge.
- A quote is an estimate until shipment details are verified at pickup or processing.

17. Shipment Insurance

Optional shipment insurance is available for eligible shipments. Insurance uses the customer-declared item value and may require proof of value for a claim.

- Insurance fee: 2% of declared value.
- Minimum insurance fee: 20 EGP.
- Maximum declared value supported by the standard parcel insurance workflow: 50,000 EGP.
- Insurance does not cover prohibited contents, fraudulent value declarations, inadequate packaging, or exclusions stated in the shipment terms.

18. Cash on Delivery (COD)

Cash on Delivery is available for eligible domestic shipments and is commonly used by merchants. The recipient pays the collection amount at delivery, and OrbitX settles eligible collected funds according to the merchant account arrangement.

- COD service fee: 1.5% of the amount to be collected.
- Minimum COD fee: 15 EGP.
- Maximum standard COD collection amount: 30,000 EGP.
- COD availability can depend on the destination area and merchant account status.
- A refused COD shipment follows the normal Return-to-Sender process unless a merchant-specific agreement states otherwise.

19. Delayed and Potentially Lost Shipments

A shipment is not automatically considered lost because it is late. OrbitX first reviews the tracking history and operational events.

A domestic shipment with no tracking movement for 5 business days may be escalated for a lost-shipment investigation. An international shipment with no tracking movement for 10 business days may be escalated for investigation, although customs delays may require additional review.

20. Lost Shipment Compensation

Compensation is considered only after OrbitX completes an investigation and confirms that a shipment is lost.

- For an eligible insured shipment, compensation is assessed against the declared value, supporting proof of value, and insurance terms.
- For an eligible uninsured shipment, compensation may be up to five times the original shipping fee.
- Maximum compensation for an eligible uninsured standard parcel is 1,500 EGP.
- Prohibited contents, fraudulent claims, and certain packaging-related losses may be excluded.

21. Damaged Shipment Claims

Customers should report visible or discovered shipment damage within 48 hours of delivery. Reporting after this period may limit OrbitX ability to verify the condition and handling history.

A typical damage claim should include the tracking number, photos of the outer package, photos of the damaged item, and proof of item value when compensation is requested. OrbitX may request additional evidence.

- Typical claim investigation time: 3 to 7 business days after required evidence is received.
- Compensation depends on investigation findings, insurance status, declared value, proof of value, packaging quality, and applicable limits.

22. Returns Initiated by the Sender

A sender may request a return before final delivery when operationally possible. A return request is not guaranteed once a shipment is Out for Delivery or already Delivered.

Return charges may apply. A returned shipment follows the same handling and prohibited-item requirements as the outbound shipment.

23. International Shipping

OrbitX offers international shipping to selected destinations. International delivery typically takes 3 to 8 business days after export processing, but customs clearance can extend the total transit time.

The sender is responsible for accurate customs information, item description, declared value, and required documents. Destination-country duties, taxes, import restrictions, or customs charges may apply and are not automatically included in a domestic quote.

24. Customs Clearance

The status Customs Clearance means the shipment is being reviewed or processed by customs or a customs-related handling partner. OrbitX cannot guarantee the time required by customs authorities.

A customer may be asked to provide an invoice, identification, product description, permit, or other document. Failure to provide required documentation can delay or prevent delivery.

25. Business Accounts

OrbitX business accounts are intended for merchants and organizations with recurring shipping needs. Available features may include shipment dashboards, scheduled pickups, COD settlement, consolidated billing, and account-level support.

Business pricing and settlement schedules may differ from standard public parcel pricing and should not be invented by the customer-support assistant. Account-specific commercial terms require the relevant business account information.

26. Customer Support Channels

- Live chat: available 24/7 for general support and automated assistance.
- Phone support: 9:00 AM to 10:00 PM, Saturday through Thursday.
- Support email: support@orbitxlogistics.com.
- Business account support: business@orbitxlogistics.com.
- Claims email: claims@orbitxlogistics.com.

27. Escalation Guidelines

The assistant should escalate or direct the customer to human support when a request requires manual authorization, evidence review, legal or customs interpretation, a business-specific contract term, or an action that the available tools cannot perform.

- Examples: changing shipment ownership, approving exceptional compensation, handling disputed COD settlements, processing dangerous goods, changing customs declarations, or overriding a confirmed operational restriction.
- The assistant should clearly state when it does not have enough verified information rather than inventing a policy or shipment event.

28. Assistant Reliability Rules

The OrbitX AI assistant should use the knowledge base for company policies and service information, the shipment tracking tool for shipment-specific status, and the delivery quote tool for route-based domestic quote calculations.

The assistant must not fabricate shipment events, prices, policies, delivery guarantees, compensation approvals, or tracking updates. When a tool returns an error or no record, the assistant should explain the limitation and request a valid input or direct the user to support when appropriate.

29. Example Questions the Knowledge Base Can Answer

- How many delivery attempts do you make?
- Can I ship a laptop or a glass item?
- What does Customs Clearance mean?
- What happens if the recipient refuses the shipment?
- How long do damage claims take?
- How does shipment insurance work?
- What is the maximum parcel weight?
- Does Same-Day Delivery work for long-distance routes?
- What happens if a shipment has not moved for several days?
- How much is the COD service fee?
